Authorization for this examiner's amendment was given in a telephone interview with Steven DiPasquo on 29 March 2007.

In the claims:

Cancel claims 1 – 20.

4. The following is an examiner's statement of reasons for allowance: Jerbic discloses most of the claimed invention. However, Jerbic is silent in having a comparator having a first input terminal receiving the normalized etchant gas concentration signal and a second input terminal receiving a reference signal representing a desired etchant gas concentration, the comparator for outputting an error signal for controlling the first mass flow controller, said error signal representing a difference between said reference signal and said normalized etchant gas concentration signal. Jerbic discloses an actinometry monitoring device that compares the ratio of the etchant gas with the ratio of a non-reacting gas and adjusts the etchant gas accordingly. It would be impermissible hindsight to modify Jerbic to have a comparator that compares a normalized etchant gas concentration and compares it to a reference signal of the etchant gas

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
